Standing Topics

With Tina Buskirk's move to the FAAST Team, Joe Remington will be the FSDO interim POC for DPE. Jacob Hanson continues as a DPE POC also.

Issues and Problems:

Initial CFI Practical tests: Testing of CFI applicants shows lack of training in general. Many fail to perform with the instructional knowledge. Correlation level of learning is not being reached applicants are still rote level.

Slips to a Landing (<http://azdpeag.org/wordpress/wp-content/uploads/2012/04/DPE-BULLETIN-10.pdf>) many do not understand the tasks and the most recent Airplane flying handbook removed some important points. Airplane flying handbook has forward slip maneuver not forward slip to landing.

Runway incursion avoidance: http://www.faa.gov/documentLibrary/media/Advisory_Circular/AC%2091-73B.pdf

FAA Publication Changes: use the subscribe button http://www.faa.gov/training_testing/testing/. We strongly suggest you subscribe to this website for the notices they provide on the changes to the testing environment and documents.

Some of the ACS information suggests the ACS will be active in summer 2016. Airmen Testing Website Changes (<https://www.faasafety.gov/SPANS/noticeView.aspx?nid=6237>) Airman certification standards are being slated for next June. It is going to start with probably private and CFI.

Bulletins: See and Share—Slips to Landing (<http://azdpeag.org/wordpress/wp-content/uploads/2012/04/DPE-BULLETIN-10.pdf>)

Airspace and Airports: Construction and closures continue. Check NOTAMS. ILS availability is constrained.
